

Meritorious Award

Dr. Alan Cheville

For being instrumental and critical in building the TELPhE division.

For pioneer work to reframe and stimulate innovation in the field of technological literacy/philosophy of engineering to the public at large, the educational community in particular across the spectrum of ASEE, and through outreach at other conferences and events.

For promoting the ideas of TELPhE at the national and international level.

For authoring/co-authoring defining papers for TELPhE, participating on multi-disciplinary panels at ASEE as a TELPhE representative, and actively promoting integrations of technological literacy/philosophy of engineering into the liberal arts curriculum thereby contributing significantly to the broader awareness of the need for technological literacy/philosophy of engineering within and outside the engineering and academic community.
