

Meritorious Award

Dr. Dan G. Dimitriu, P.E.

For being instrumental and critical in building the TELPhE division.

For introducing educators at the secondary school-level directly to engineering by leading them in special courses designed to connect classroom lessons with real-world engineering applications, with the outcome that these teachers developed a deeper understanding of the links between their instructional material and actual engineering practice.

For connecting engineering and technological literacy.

For pioneer integration of technological literacy/philosophy of engineering into the curriculum of non-engineering students to foster in them an awareness and understanding of modern technologies such as computers, telecommunications, medicine, environmentally sound energy production, and transportation in layman's language, and doing this for a diverse and inclusive urban student population.
