

Meritorious Award

Dr. Guru Madhavan

In recognition of his outstanding contributions in informing and advising public policy, and in expanding the public consciousness of engineering through numerous books, public and invited presentations, and participation in numerous national government agencies and internationally through advisory and policy-making boards, and task-forces.

For working with leaders in anthropology, biology, business management, chemistry, civic studies, defense, economics, ethics, finance, foreign affairs, history, law and justice, medicine, narrative communication, philosophy, physics, public health, sociology, and veterinary sciences, thus establishing him as a distinctive scholar and practitioner.

For superb leadership in engineering with insights on practice, education, research, and policy actively working to enhance the social consciousness of engineering and its vital synergy with public affairs.
