

# **Meritorious Award**

## **Dr. Mani Mina**

For pioneer work to reframe and stimulate innovation in the field of technological literacy/philosophy of engineering across the educational community, particularly across the spectrum of ASEE and IEEE, and through outreach at other conferences and events including the Frontiers of Engineering Education Symposium and the National Academy of Engineering to promote the criticality of instilling and integrating a philosophy into the teaching of engineering

For notable contributions to technological and engineering literacy and the philosophy of engineering including the authoring/co-authoring of defining papers for TELPhE.

For contributing significantly to the broader awareness of the need for technological literacy/philosophy of engineering within and outside the engineering and academic community.

For the development of engineering minors as an option through which non-engineers can obtain a meaningful level of technological literacy while pursuing other majors.
