

The Punch List

Best Practices for Electronic Resources

<http://eld.lib.ucdavis.edu/punchlist/PunchlistRevision2005.pdf>

The Punch List Covers the following areas of concern to librarians:

1. Access Authentication
2. Co-Branding of Products
3. Copyright Issues
4. Cover-to-Cover Digitization
5. Digital Quality
6. Interlibrary Loan & Electronic Reserves
7. Linking to Content
8. Perpetual Access
9. Purchase Models
10. Retractions and Corrections
11. Statistics

The 200+ members of the Engineering Libraries Division of the American Society for Engineering Education unanimously endorsed the practices recommended in this document.

We would like to open the conversation between librarians and content providers about the issues detailed in the Punch List and about related issues of importance to both groups.

Our goal is to effect change that benefits all parties involved. We welcome your communication on this topic!

*We invite content providers to contact us at
ELD-PL@u.washington.edu.*
