May 1996

Message from the Chair

Well, after three years in the secretary-treasurer/program chair/chair rotation my stint on the ELD executive committee is coming to a close. It has been my privilege to serve ELD during this exciting time of transition for the profession. I want to thank you for the confidence you demonstrated by electing me to this position and for the creativity and hard work that you have put into ELD.

In keeping with the spirit of our conference location of Washington, D.C., I would like to report back on the progress made on the four objectives I stated at the beginning of my "term of office."

1) *To ensure the continued quality of our conferences by providing support for our program chair.*

This year we asked the ELD Directors to participate in conference planning throughout the year. Coupled with greater involvement by the Extended Executive Committee in conference planning, this approach has lessened some of the burden on the Program Chair. Andy Stewart, our 1996 Program Chair affirms that this approach has been productive.

2) *To establish an ELD WWW Homepage.*

Thanks to the fine work of David Carter and Jim Ottaviani we now have a web page which is accessible from the ASEE Homepage. Go to <http://www.asee.org/asee/> and look under "ASEE Divisions."

3) *To promote ELD to engineering educators and librarians.* Throughout the year you have heard about the various presentations and publications by ELD members. These efforts are increasingly bringing our profession to the attention of the engineers and engineering educators with whom we work. With this summer's ELD-sponsored mini-plenary session on electronic publishing, we break new ground in promoting ELD to ASEE and to the engineering community.

4) *To facilitate access to ELD to new information professionals.*

As you will read later in this issue, the Ford Motor Company will provide funding to enable a new librarian to attend the ASEE conference this year. It is my hope that we can

continue this award as an annual event. The importance of technical innovation, professional networking and the exchange of ideas compels us to work harder to bring new librarians into ELD.

Success on these objectives has been possible because of the teamwork and commitment of our officers, committee members and general membership. We have done great things in the last year and our work has created the opportunity for even more significant accomplishments. I am very optimistic about the future when I consider the increasing membership of the division and the fine group of individuals who are currently active in ELD governance. It has been a real honor to have held this position and a great pleasure to have worked with all of you.

Sincerely,

Bob Schwarzwald, Chair, ASEE/ELD
Supervisor, Research Library & Information Services
Ford Motor Company

New Award Provides Conference Sponsorship

The Engineering Libraries Division of the American Society for Engineering Education is pleased to announce that the Ford Motor Company is sponsoring a new engineering librarian for attendance at the ASEE Annual Conference in Washington D.C. June 23 (Sunday) - 26 (Wednesday), 1996.

The sponsorship provides: conference registration, ASEE picnic, ELD dinner, PIC IV awards luncheon, and four nights lodging in a University of Maryland--College Park dormitory. Travel is not included.

The award will be judged based on the clarity and originality of a two-hundred word essay describing the mission and vision of librarianship in engineering education. Eligibility and application requirements were announced on ELDNET-L and on the ELD Home page.

The award winner will be expected to write a brief report of impressions and experiences of the conference. This report will be printed in the ELD newsletter and sent to the Ford Motor Company.

The award will be announced on May 21.

Paige Gibbs, Chair, Awards Committee

I See D.C. and My Boss Thinks I'm Working

Information for planning your free time at Conference in Washington D.C. and surrounds is available at <http://poe.virginia.edu/~jfo/eldmeet.html>

Thanks to Fred O'Bryant, our fun-loving and fearless Membership Directory Editor!

Incredible Interdependence

Nearly all program arrangements for ASEE 1996--Washington are complete. (Whew!!) I hope you have made arrangements to take full advantage of this year's conference. Keep in mind for planning purposes that there isn't very much free time between ELD-sponsored or ELD-related sessions. Most of your sightseeing or touring will be done either before Sunday or after Wednesday.

I want to highlight the ELD Annual Banquet, Session #2741, one more time. The location, the Old Ebbitt Grill, comes highly recommended. Be sure to register for this event, the social highlight of the ELD year. I am most appreciative of Sheila Curl's work with the restaurant to make our evening a memorable one!! Thank you, Sheila!!

I don't have sufficient space to list everyone here, but please also take a minute in Washington to thank your session chairs and presenters for their efforts in preparing this year's program. It is a lot of work with "fifteen minutes of fame" at the conference itself. Rest assured, everyone has worked diligently to bring ****YOU**** the best program possible.

I'm proud to let you know the May-June ASEE *Prism* contains an article about electronic publishing, along with a tie-in to the ELD Mini-Plenary Session. Moderator John Saylor has lined up three outstanding speakers. We hope to attract many ASEE members from other divisions and increase awareness of the implications of shifts away from traditional print publication. Please talk this session up to ASEE members of other divisions from your campus. (Here's a panic-inducing factoid for program chairs: ASEE staff is planning for 300 attendees at this session.)

From the minimalist scratchings on poster paper to the pickiest details of room arrangements or hardware cabling, I consistently receive positive responses both from ASEE Headquarters staff and from you as ELD members. Steven Covey writes of three sequential levels of human interaction: dependence-- independence-- interdependence. As my year as ELD Program Chair draws to a close, I want to emphasize this point: I have received an incredibly high level of cooperation from everyone!!

This has been an invigorating, productive, and positive year. It has been an exhilarating ride, and I look forward to serving you as Division Chair.

Sincerely,

Andy Stewart, Program Chair
University of Missouri--Rolla

More Conference Information

(Ed. note--The following is an excerpt from a message originally posted to ELDNET-L, not that recurring problem with deja-vu!)

I recently returned from an ACM Digital Libraries conference trip to D.C., during which I took the opportunity

to scout our June ASEE conference location. I'd like to share my notes with you, in the hopes of giving you a glimpse of what to expect, in addition to what you may have already read in the advance conference program and on our Web pages for ASEE/ELD conference info. Please don't forget to visit the latter ASAP!

1) Conference location/hotel commentary

The Sheraton Washington has more verbiage about it in the advance conference program than does the Omni Shoreham, so I thought I'd elaborate on the Omni. Both are older, elegant hotels. The Omni is the more elegant of the two, has a pool as does the Sheraton, and two tennis courts. It is around the corner from the Sheraton Washington, and less than a full block from the Woodley Park-Zoo (red line) Metro stop.

2) Restaurants within one block of both hotels

Dining choices at this venue are overwhelming. In addition to the hotel restaurants, we will have a TON of choices within arm's length ... And if you get tired of these options, there's always the Cajun Bangkok restaurant in Old Alexandria for the bravest of us!

I searched the DC Dining Web page for "Connecticut Avenue" and looked at the 2600 block:

Fortune Express
Hardee's
Lebanese Taverna Restaurant (Middle Eastern - Lebanese - Mediterranean)
Panda Gourmet (Chinese)
Rajaji Curry House (Indian)
Saigon Gourmet (Vietnamese)
Tandoor Taste of India (Indian) - Delivery by A La Carte Express
Thai Town Restaurant (Thai)
Tucson Cantina (Southwestern - American) - Delivery by A La Carte Express
Woodley Cafe

Recommendations from one of the locals on her favorites in this area include Thai Town, Cafe Paradiso (not listed above), and Dolce Finale as a great dessert place.

Contact me privately if you have specific questions about anything I've mentioned. There are several ELDers on the east coast who know a lot more about D.C. than I ever will, so speak up if you have questions they might be able to help you answer!

Hope this helps,
Glee (Glee Willis, Chair, Membership Committee)

New Member Profile

Jacqueline Riley is the Information Services Librarian at the Oregon Institute of Technology Library in Klamath Falls. She has been at the library for almost 2 years, serving as Library Webmaster and subject specialist with collection

development in engineering, computer and environmental science. Jacqueline received her MLS from the University of Washington.

Deborah Kegel, Membership Committee

People & Places

Nancy Schiller, Engineering Librarian at the State University of New York at Buffalo, has received a grant from the SUNY Office of Educational Technology to explore the feasibility of delivering library resources and services via the Internet to students enrolled in distance education programs in engineering and nursing. Using digitizing technologies and the hypertext linking and organizational capabilities of the World Wide Web, the UB Science and Engineering Library, the Science Library at Binghamton University, and the Feinberg Library at SUNY Plattsburgh will work together to develop a model system that will allow them to explore issues related to providing access to online course-related materials and services in support of distance education. The project builds on a prototype WWW service which, since the Fall of 1995, has been providing access to course materials developed by instructors of distance education courses offered by the UB School of Engineering and Applied Sciences. The URL for the prototype system is <http://wings.buffalo.edu/libraries/course/course.html>.

Don Richardson, at the Gordon Library, Worcester Polytechnic Institute has started a subscription to the Engineering Information Village with Compendex Web. He'll be interested in talking with other folks at ASEE who are using it too.

Nestor Osorio, Science/Engineering Librarian from Northern Illinois University chaired the session on "Emerging Technology" at the 1996 Illinois/Indiana ASEE Sectional Conference. The conference main topic was "Re-Engineering Engineering Education" and took place at Bradley University in Peoria, Illinois, March 22-23. At the conference Nestor also presented a paper entitled: "An Assessment Model for Engineering and Technology Collections in The Nineties".

Bob Schwarzwald has been named as a member of the new Publications Advisory Board for the Society of Automotive Engineers. SAE is establishing this group to obtain more customer feedback on their publishing process and to examine options for digital publication. SAE is the world's foremost publisher of technical automotive literature and is a significant publisher of aerospace literature.

New Publication

"ACRL Academic Science and Technology Libraries: Report of a Survey" by Julie Hurd appeared in *College and Research Libraries* (March 1996) p.144-160.
spotted by Linda Musser, Penn State

Annual Reports from Officers and Committee Chairs, 1995-96

Accreditation and Standards

I have been investigating the possibility of having ELD statistics included on ASEE's Dataworks CD-ROM. Headquarters has been reviewing its own data collection methods. It has been working with advisory committees to develop standard definitions of terms to help ensure data consistency. I hope to have more to report by June.

Karen Andrews, Chair, Accreditation and Standards Committee

Archives

The major acquisition this year was a collection of ELD materials from Karen Andrews.

Don Richardson, Archivist

Awards

The Awards committee did not receive any nominations for the Homer Bernhardt Award this year.

The Ford Motor company is sponsoring attendance for a new engineering librarian at the 1996 Annual Meeting. A competition was established by the Awards Committee for this sponsorship. Announcements were made on ELDNET-L and the ELD home page. The awards committee will determine the recipient by May 21. The committee thanks ELD chair Robert Schwarzwaldner for obtaining this corporate support.

Paige Gibbs, Chair

LISTSERV ELDNET-L

ELDNET-L is the ELD-sponsored electronic (listserv) discussion list addressing issues related to or of interest to engineering and related subject area libraries and librarians. ELD members constitute the core of the list membership, although subscription is open to anyone.

ELDNET-L subscriber history:

Start-up (August 1991): 62
1991/92 annual report: 119
1992/93 annual report: 187
1993/94 annual report: 314
1994/95 annual report: 436
1995/96 (10 April 96): 477

As predicted in last year's annual report, the total number of ELDNET-L subscribers has definitely begun to plateau. One might think, on first examination, that ELDNET-L has added markedly fewer subscribers than in years past. That is not the case. While the rate of new subscribers may have fallen a bit, it is still fairly brisk. What we're seeing instead is:

(1) an increase in the number of list subscribers with peripheral interest in the list and its content who have chosen to remove themselves from the list, combined with (2) some effort on my part to clean old, incorrect, and duplicate addresses from the subscriber list. The result is a list of subscribers who are more centrally interested in the topics and information available on ELDNET-L.

The number of messages posted to the list increased slightly during the last year. It would appear that both the membership totals and the list traffic numbers are moving toward an equilibrium, from which, neither total should vary noticeably either positively or negatively from year to year. However, I don't believe that point has yet been reached, and think both totals will continue to show small increases for at least the next year. (Anyone have any ideas for celebrating ELDNET-L's 500th subscriber, should we reach that total during the coming year?)

It would appear that a number of new subscribers to ELDNET-L have, in turn, joined ASEE and ELD, as I hope our Membership Committee Chair's new numbers will show. The activity increases are posing no known monetary or other burdens to ELD, ELDNET-L, or myself. I recommend that no efforts be made to constrain access to the list or to open knowledge of its existence. I'm pleased with the number and mix of list subscribers; I hope that list traffic will continue to increase; and I hope that ELDNET-L, along with the new ELD Home Page, will continue to sway newcomers to join ASEE and ELD!

Mel DeSart, ELDNET-L Editor

Literature Guides

Sheila Curl began her term as the new co-chair of the subcommittee. Beth Brin, who became chair of the Publications Committee, edited one last guide, on Civil Engineering. Three new members joined us: Kelly Jordan, Nancy Zachariassen, and Ann Ward. With their able and much appreciated help we are currently reviewing five new guides, and hope to get them published by summer: Aerospace Engineering, Applied Optics, Computer Graphics, Nuclear Engineering and Statistical Information for Engineers.

The following Literature Guides have been assigned to compilers and are in various stages of completion: Electrical Engineering, Electrical Power Engineering, Environmental/Pollution Engineering, Ergonomics, Metallurgical Engineering, Soil Mechanics, Transportation, and an update of Mechanical Engineering.

We are seeking compilers for guides on the following topics: Automotive Engineering, Bioengineering, Hydraulic Engineering, Ocean Engineering, Robotics/Manufacturing, Statics and Applied Mechanics, Semiconductors, and Superconductors. Suggestions for other topics are always welcome.

Godlind Johnson, Co-Chair, Subcommittee on Literature Guides

Membership

As of April 1, 1996, the ELD roster from ASEE headquarters lists 173 members, an increase of 20 members from the same date last year. By June 30, the membership number is expected to top the 175 mark. This will be the third year in a row that we have added 20 more members to the ELD tally, and the most exciting part of all this, of course, is the global representation of our membership. ELD now includes a very strong Canadian contingent (6% of our membership), as well as members in Finland, Korea, Mexico, the Netherlands, New Zealand, and Portugal.

Deborah Kegel, Gretchen Sneff, and (soon) Jim Van Fleet continue their enormously popular inclusion of brief biographies of new ELD members in the Division's newsletter. Fred O'Bryant produced a crisp, new printed 1995-1996 ELD Membership Directory for distribution to all members, and works tirelessly throughout the year to track all membership address changes to be reported to directory recipients via the newsletter.

As of April 1st (3/4 of the way through the recruitment year), the Chair had mailed a total of 223 "Invitation to Join ELD" packets to prospective ELD members throughout the world. At the customary rate of 25 mailed per month, I estimate that the total for the full recruitment year (July-June) will be 300 packets mailed. Follow-up letters have been sent to 12 people whose ASEE memberships have lapsed since 1995, and to six people who paid ASEE membership dues but neglected to pay ELD membership dues.

This year the Chair launched a new, all-out "in-your-face" bombardment on several online fronts to attract additional new members. The newest of the recruitment strategies included: publicizing the distribution of the new membership directory; publicizing contact info for membership in EVERY ELD conference announcement mailing; publicizing "the ELD conference experience" commentaries solicited from the ELD membership; and posting a "scouting report" about the upcoming conference site. Each of these efforts flushed out yet another handful of "lurkers" from ELDNET-L or STS-L. I expect to see MANY new faces at the ELD sessions in D.C., and predict an all-time high in ASEE conference attendance by the ELD membership.

The behind-the-scenes membership work is conducted smoothly thanks to the marvelous teamwork of the scouts/liasons, the membership directory editor, the newsletter editor, the ELDNET-L moderator, the new member biographers, and the program chair.

1995/96 Membership Committee Members: Norma Godavari, Deborah Kegel, Fred O'Bryant, F. Orion Pozo, Gretchen Sneff, Jim Van Fleet, and Glee Willis.

Glee Willis, Chair, Membership Committee

Membership Directory Editor

The following are the actual costs for the 1995-1996 ASEE Engineering Libraries Division Membership Directory and Resource Guide:

Printing and Binding (200 copies)	\$470.51
Mailing Envelopes	12.10
Domestic Postage	180.32
Overseas Postage (Surface and Air)	30.82

Total Mailed 180 (161 US & 19 Foreign)
Total Cost: \$693.75

The ELD continues to add new members throughout the year, and I expect to mail an additional 15-20 copies of the Directory between now and the end of 1996. I would expect production and mailing costs for the 1996/97 edition of the Directory to be about the same as for this edition, barring unforeseen changes in postal rates.

In his 1994/95 Annual Report, Directory Editor James Van Fleet estimated that the next edition of the Membership Directory might cost as much as \$800 to produce. He was not far off in his estimate. I was able to reduce the domestic postage costs somewhat by using our library's bulk mail (library rate) permit, but postage was still a large factor in expenses, accounting for almost a third of the total.

Although the ELD Membership Directory is a very useful document, it is a costly one for the Division to produce. I would like to suggest for discussion possible ways for reducing costs. First, eliminate the Job Descriptions and Duties and Bylaws portions of the document and supply these to new members as a separate booklet and only by request to others. Currently, this would save about \$55 in printing costs per print run. Second, supply the Directory as an unbound, three-hole-punched document which members could bind or place in a notebook of their own choosing. This would save about \$140 per print run. Third, consider producing the Directory every other year instead of annually. Loose-leaf supplements could be sent to members in the interim years to keep their Directory up to date. Finally, consider going to a WWW-based Directory. I have seen such a directory for another organization which is password-protected in such a way that members can update their own entries but others cannot make changes to the database. I have no cost figures at present for such a system but there are considerations of providing server space and access for those who have no Internet/WWW connections. I welcome discussion of these suggestions as well as other ways to keep our Directory cost-efficient without sacrificing its quality.

I appreciate the help and support of the ELD Extended Executive Committee and the ELD membership in the production of this year's Membership Directory.

Fred O'Bryant, Membership Directory Editor

Newsletter

Four issues of the ASEE/ELD newsletter were produced and mailed. My institution supported duplication and paper costs, so the only production costs to the organization were postage, which varied by issue due to size of issue and membership numbers at the time.

September 1995	74.97
December 1995	121.93
March 1996	63.39
May 1996 (est.)	140.00
Total	\$400.29

Newsletter issues were sent to David Carter, University of Michigan, who added them to our Web page. I thank all the members who contributed their ideas, enthusiasm and articles to the newsletter. It's a continuing adventure!

Dena Thomas, Editor

Nominating

This year the Nominating Committee, a.k.a, the California Mafia, consisted of Steve Gass (Stanford University), Christy Hightower (University of California at San Diego), and Ann Ward (California Polytechnic State University at Pomona). We are pleased to offer for your consideration Beth Brin for the position of Secretary/ Treasurer and Locke Morrisey for the position of Director.

Steve Gass, Nominating Committee Chair

Publications

The Engineering Libraries Division published the "Selective Guide to Literature on Civil Engineering" this year. This guide was advertised on several listservs.

Sales figures for the ELD publications ("Selective Guides to the Literature on..." and "Union List of Technical Reports, Standards and Patents in Engineering Libraries") from October 1, 1995 through March 19, 1996 (arranged by date published) are:

Civil Engineering	15
Engineering Geology	14
Integrated Circuits	10
Materials	10
Composites	7
Telecommunications	13
Advanced Ceramics	5
Union List (1992)	4
Artificial Intelligence	7
TOTAL	85

One paper was submitted for publication in the proceedings. The paper was refereed and accepted for publication. The review timeline was changed to correspond with ASEE Headquarters deadlines (publishing the proceedings on CD-ROM took more production time).

An ELD Publications Web page was created with information on the available publications. Webmaster David Carter html-ized the page (thank you David!) and a link was also created from the ASEE Publications Page to the ELD Publications page.

Activities of the subcommittees are reported separately.

Beth Brin, Publications Committee Chair

Union List

The "Union List of Technical Reports, Standards and Patents in Engineering Libraries" (3rd ed.) is set to be published in mid-1996. Response from contributing libraries was not as heavy as we had hoped, with not all previous participants choosing to continue their participation. The advent of increased Internet access as well as holdings in OCLC and RLIN were cited among the reasons for non-participation. Nonetheless, there is a core of about 30 libraries which chose to share their holdings. Publication of the Union List was delayed until 1996 due to time constraints of the editor who most sincerely apologizes for the delay.

Linda Musser, Editor, Union List

Engineering Information Village @ UMaine

Engineering Information, Inc., publisher of Engineering Index and other well known engineering reference tools, has expanded its services to the World Wide Web. Ei's Engineering Information Village(tm) is a collection of free and fee-based services providing timely information of interest to engineering students, researchers and practicing professionals.

Ordinarily, an academic subscription to the Village could cost as much as \$27,000 per year. However, Fogler Library, in cooperation with the six other New England land-grant institutions, has negotiated a four month trial subscription.

UMaine faculty, staff and students may access the Village using a standard Web browser from any computer connected to the Internet via the campus network. Access is restricted by IP address.

User feedback will be vital in determining whether or not access to the Village continues beyond the trial period. If successful, Ei Village will become one of several Web-based information services purchased by the New England land-grant university consortium.

The Village's featured services are Tech Alert, Spotlights and Compendex Web. Tech Alert is a limited database that includes the last two months of Ei Compendex and Ei Page One and the most recent three days of AP and Reuters news articles. Spotlights is a weekly literature alert service based on searches of Compendex Plus. Users can view summaries and citations of the most recent publications in more than 150 engineering and industrial topic areas.

Ei Compendex Web includes Compendex Plus from 1989 to the present as well as Publications in Engineering (PIE). There are two search options, Assisted and Expert. The first provides a step-by-step form for building searches using short descriptive phrases and is intended for users who are not familiar with database searching. However, the form interface is long and difficult to follow. Novice searchers may find it more frustrating to learn than the Expert Search system mode.

Users familiar with database searching will have little problem with the Expert Search interface. It is considerably shorter than the Assisted Search (slightly more than two screens) and well-organized. Searchers may use keywords to search the Basic Index (Title, Descriptors and Identifiers) or Title Words, Subjects, Authors and Serial Titles. The last four categories include alphabetical indexes that can be used to browse and paste terms into the search fields. Searches can be limited by year or discipline. Boolean operators, e.g., AND, OR, NOT, and the proximity operators ADJ or W/x can be used to link keywords. Search lines are limited to 65 characters. Brief but clear help pages explain how to search each field. Results are displayed by title, serial title, brief, full or tagged record.

Ei Village collects and reviews Internet resources of interest to its users. The Editors Choice collection of 7,500 annotated engineering and related sites is well organized and more informative than most laundry-list Web indexes. Additional document delivery services give subscribers the option to order articles online. Institutional subscribers may block this function to prevent inadvertent ordering.

Like all sites, access to Ei Village is subject to the vagaries of the Web. Speed and response delay is highly dependent on time of day, network connection and type of computer. Generally, a 486 or better PC with a direct network connection delivers satisfactory performance.

Though Ei Village uses graphics sparingly, moving from page to page can take more than one minute in peak hours. Early morning or evening use reduces such delays to a few

seconds. Every transaction in Compendex Web is interrupted by Netscape's security warning alert. This repetitive message, which requires an additional mouse click to remove, can be turned off by deselecting the option in the warning window itself. With the exception of a few minor typos and dead links Village maintenance is very good.

Michael White, University of Maine

IATUL in Irvine

The next meeting of the International Association
of Technological University Libraries will be
June 24-28, 1996 at the University of California,
Irvine. The theme of the conference is "Networks,
Networking, and Implications for Digital Libraries."

Please contact Julia Gelfand for information:

This is the last newsletter issue for this academic year. It is also the final issue from my sabbatical stay in Ireland. I am enjoying meeting Irish librarians and learning about their viewpoints and professional concerns. I am also thoroughly enjoying meeting the Irish in general, who have such a warm and friendly spirit. Dublin, with its vibrant theatre, art, and music scenes, is captivating. You may have heard there are a fair number of pubs here, as well. I will miss the conference this year, but will think of you all.

Cheers!

Dena
